## charnwood

## cranmore 5

The charnwood cranmore is a classic new wood burning stove designed and made on the isle of wight. This latest stove collection takes inspiration from the Regency era with a single framed glass door and archetypal detailing. The pleasing proportions of the Cranmore make it well suited to a traditional fireplace and with a large picture window it is an ideal replacement for an open fire. The stove can also work equally well in a freestanding situation.
